

Alisun 200 Collagen

For pure and timeless beauty

Collagen
by alisun

A collagen deficiency manifests itself in accelerated skin ageing, in the atony of muscles, ligaments and tendons, in an increased risk of osteoporosis and in a general weakness of the connective tissue.

For who?

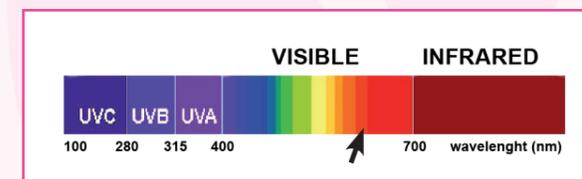

The Alisun 200 Collagen therapy does not heat the skin like other anti aging therapies. It is a comfortable, relaxing therapy and can be used by everyone, no matter the skin type, sex or age.

Lines and wrinkles

Connective tissue becomes softer and looser with age and this can be seen in lines and wrinkles which develop in the skin, in particular in the face, décolleté. The degradation of collagen and elastic fibers in the dermis (corium) means that the skin becomes less elastic. This is partly a result of the normal aging process and thus genetically pre-programmed. Outside factors do, however, also play a role.

Light therapy

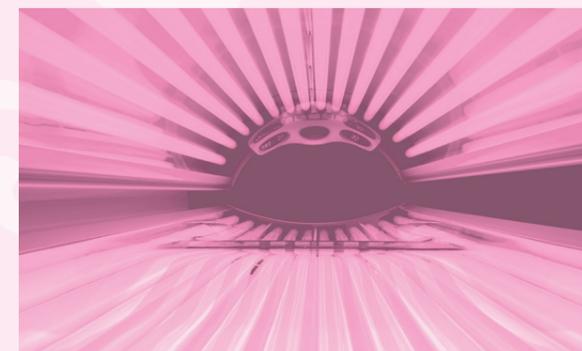

The gentle red light waves in the area of 550-700 nm of the Alisun 200 Collagen encourage the skin cells to produce collagen, elastin and special enzymes that are necessary to improve the skin structure. This process, which happens in the walls of the small blood vessels, has a skin-tightening effect and stimulates the oxygen absorption and detoxification of the skin. The ability of the skin to absorb and store moisture will improve. In addition, the regeneration and reproduction of healthy skin is visibly increased.

The Alisun 200 Collagen

The soft red light therapy with the Alisun 200 Collagen stops ageing and supports the skin to keep its firmness. The Alisun Intense Collagen tube has been specially designed for the Alisun 200 Collagen. The gentle red light waves (550-700 nm) of the Alisun 200 Collagen stimulates the skin to start producing collagen and elastin fibers in the deeper layers of the dermis again. This photo bio stimulation has a visible smoothing effect on wrinkles and activates the metabolism of the skin.

It's neither UV nor laser, it's photo therapy!

Bio stimulatory effects

It takes time for the structure of your skin to improve. A course with the Alisun 200 Collagen should last at least 6 till 8 weeks to produce bio stimulatory effects. The initial exposure time should be no more than 10 minutes per day (3 times a week) and may be increased to a maximum of 20 minutes.

The skin should stay cool during treatments. As physically, the light source is producing and transmitting some heat, this will be filtered and cooled by the unit.

Due to cell-stimulation in the skin, the skins appearance is not just looking fresher but also smoother. Black bags disappear, pores shrink, your skin becomes softer and lumps and bumps vanish. Both your skin's ability to heal itself and cell regeneration are considerable improved.

Connective Tissue and Collagen

Connective tissue is our body's network. It consists of cells and the extra cellular matrix (ECM). This last consists mostly of collagen (structural proteins), fibers which give shape and elasticity, non-collagenous proteins, basic substance and water. Connective tissue is interlaced in a net-like manner and serves as an elastic membrane and supporting tissue between cells, organs, parts of organ and in the skin, bones, blood vessel walls, cartilage, tendons and ligaments. Collagen is an integral part of the connective tissue. It is composed of extremely fine and intertwined fibres whose length and thickness are in the nanometer area and which compose three-dimensional networks.

Connective tissue is vitally important to an organism, acting as a:

- Connection system
- Protection system
- Supporting system
- Transport system
- Supply system
- Information system

For pure and timeless beauty

The Alisun 200 Collagen benefits:

- Building up a healthy collagen network
- Visible anti-aging effect
- Reduction of lines and wrinkles (especially in the eyes zone, neckline, area around mouth and lips)
- Improves the skin elasticity, firmness and suppleness
- Boosting skin cell regeneration
- Re-tightens the skin (helps prevent cellulite)
- Increases skin's moisture absorption and moisture retention
- Improvement of oxygen intake
- Renewal of collagen and elastic fibers
- Activation of the skin's mineral metabolism
- Helps to make the skin smooth and fresh
- No negative side effects or harm
- No pain

For pure and timeless beauty

Make your dreams come true with the Alisun 200 Collagen, the perfect solution for skin rejuvenation. Independent research has shown that the collagen production can be stimulated with gentle red light waves of 550-700 nm. These light waves of the Alisun Intense Collagen lamps encourage the skin to produce collagen, elastin and certain enzymes that are responsible for the skin's supportive structure.

Light therapy with the Alisun 200 Collagen results in a true revival of the skin.

- It's not UV!
- It's no Laser!
- It's gentle & soft red light, low energy, photo bio stimulation!

Results:

Improved skin vitality
Noticeably firmer, smoother skin
Reduction of wrinkles and fine lines

230V

The Alisun 200 Collagen needs only 230 V.
Just plug it in and enjoy the benefits

Technical specifications Alisun 200 Collagen

Colour	Pearlized white
Lamps canopy	14 x 100W (190 cm)
Lamps bench	12 x 100W (190 cm)
Lamp type	Alisun Intense Collagen 100W
Weight in kg	164
Power in kW	2,47
Minimum fuse (slow)	1x16A
Connection value	230V ~ 50Hz
Maximum dimensions (cm)	220 x 106 x 112 (closed) / 145 (open)
Minimum cabin dimensions (cm)	230 x 220
